Experience

05/2020 - 09/2020

Wikimedia Foundation Google Summer of Code Participant

Google Summer of Code is a global program focused on bringing more student developers into open source software development. Students work with an open source organization on a 3 month programming project during their break from school.

06/2019 - 05/2021

Kafr El-Shiekh University Full Stack Developer

As a Full Stack Developer, I make contributions and develop Web-based Application, for the use in Kafr El-Shiekh University, such as The E-Admission System for the faculty of Art , The Archiving System for the Faculty of Pharmacy and Quality Control System for President of the University.

02/2019 - 02/2020

IEEE KSB Web Team Leader

As a Web Team leader at IEEE Kafr El-Shiekh Student Branch, I was responsible for Managing the Members at the Web Community, Developing their skills, spreading the knowledge among the community and Organizing Events and Workshops.

07/2020 - 09/2020

EraMint Back End Intern

As a php Intern, I managed to fix some bugs at existing systems, built in native php and Smarty Framework. I have worked on APIs and Dashboards, dealt with server and version control, and worked through full SDLC process

08/2020 - Current

TEDxAlexandria University PR Specialist

As a PR Specialist, I am responsible for dealing with Sponsors and Speakers, Preparing Benefits Package and Proposal, Working with The Speaker on Preparing his TEDx Talk, and being the External Image of TEDx Alexandria University

Education

06/2021

Bachelor - Kafr El-Shiekh University

Courses

PHP Self Learning

Database & MySQL Self Learning

Data Structure & Design Patterns

The Faculty of Computer & Information Technology

HTML, CSS, JavaScript Self Learning

Bootstrap & jQuery Self Learning

Achievements

08/2020

Remove the use of jQuery UI from Extension:PageForms

As a part of Google Summer of Code 2020, jQuery UI was formally deprecated among MediaWiki Developers, but Extension:Page Forms still uses it in some tasks. So, it was great to replace it with other libraries, suitable for each task.

09/2019

The E-Admission System for The Faculty of Arts

With The large number of Applicants who enroll with The Faculty of Arts, The Manual work becomes harder. This Web-Based System Facilitate the Process of Accepting Students in The Departments of The Faculty depending on their Desires and Marks.

10/2019

Archiving System for The Faculty of Pharmacy.

With the huge amount of various files in the Faculty, it was hard to organize, search or filter. The System shows the Records from the database in such a way to make it easy to search for a specific record, filter for a specific type and send and receive files among departments.

11/2020

TEDxAlexandriaUniversity Event, What Comes After

As a PR Member at TEDx, I succeeded to contact Eng. Osama Mohamed (El-Zero) -The Well Known Programmer and Instructor- and Work on Preparing his TEDx Talk, "Programming and its impact on artificial intelligence".
